

あらゆるデバイスを、ひとつの視界に。

奏

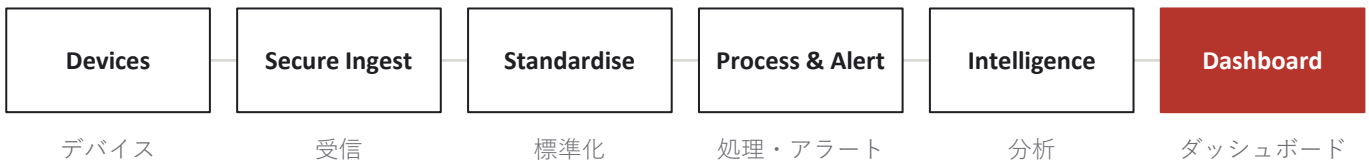

Maestro

Managed IoT Platform ・ マネージドIoTプラットフォーム

Maestro unifies devices from different vendors — vehicle cameras, building systems, industrial sensors — into a single operational dashboard. SAMSAN operates the platform end to end. Your team sees clear dashboards and timely alerts; the infrastructure remains our responsibility.

ダッシュボード

■ ハードウェア非依存

Hardware Agnostic

Works with devices from any vendor. Existing equipment connects without replacement. New device types are added through configuration, not redevelopment.

■ マネージドサービス

Operated by SAMSAN

SAMSAN configures, monitors, and maintains the platform. No servers to manage, no software to install. Your team works only with dashboards and alerts.

■ 運用の見える化

Operational Visibility

Device health, alert history, and data-flow status are visible at all times. The platform detects issues and reports them before they escalate.

安心の運用体制

Support Structure

- Dedicated onboarding by SAMSAN engineers
- Continuous platform monitoring and proactive issue reporting
- Strict per-customer data isolation with complete audit trail
- Defined data retention and access-control policies

Partner with SAMSAN for

Connected Mobility • Device Intelligence • CAN-to-Cloud • AI-enablement • Global R&D execution
